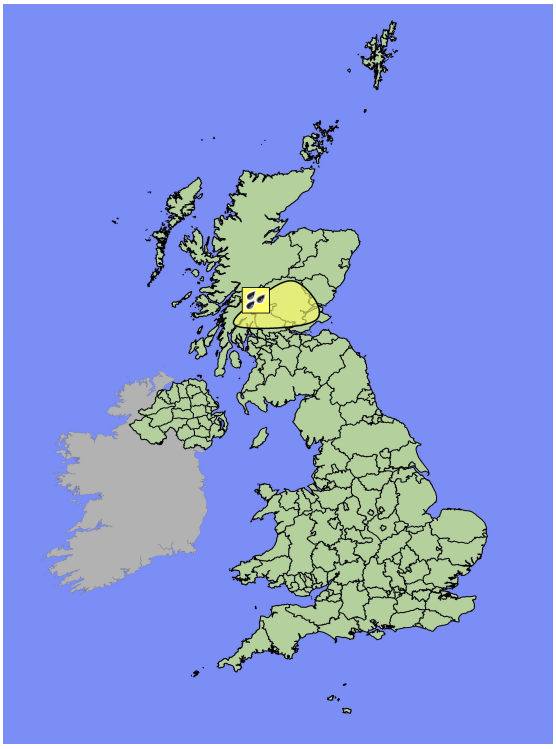
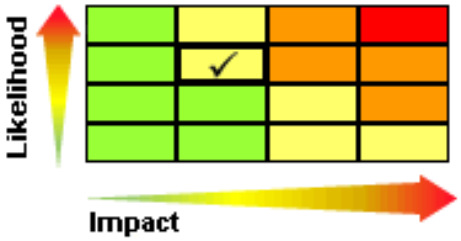
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will become slow-moving across Scotland on Thursday, bringing outbreaks of rain which will be heavy and persistent in places. As the front encounters colder air to the north some snow is likely, chiefly above around 200 metres.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Thu, 31st Jan 2013** until **09:00 on Fri, 01st Feb 2013**

Rain will become persistent and heavy at times during Thursday. Falling on already saturated ground it will lead to localised flooding. Rain will turn to snow at times, mainly above 200 metres or so, but with a risk too at low levels. Accumulations of 5-10 cm could build up in places.

The public should be aware of possible disruption to transport.
